Index to *Arnoldia* Volume 67

Items in **boldface** refer to illustrations

**A**
*Abies* spp., and exotic beetles 1: 33, 35  — *homolepis*, lightning-damaged 4: 22, 22
Abscisic acid 4: 15, 18–19  — — photosynthesis and 4: 19
*Acai* juice 3: 23
*Acorns*, features of 4: 2–5, 3–5, 10, 11
*Adenorachis* 3: 21
*Acorns*, features of 4: 2–5, 3–5, 10, 11
*Ackerman, Dr. William* 1: 24, 28
*Adirondacks*, aerial photographs and mapping 1: 10–19, 11–15, 17–19
*Anoplophora glabripennis* 1: 34, 34
Anteater 2: 30
*Anthocyanins* 3: 23
Anticancer plants 3: 23, 25
Ants, leaf-cutter 2: 30
Appalachian Mts., *Tennessee* 3: 20
Apple, original 2: 20  — — fruiting genotypes 2: 20  — — quince and 1: 3  — — scab resistance 2: 10, 10, 20
Apple-pear, *Asian* 4: 28
*Apomixis* 3: 19, 21, 22, 24–25
Arboriculture and plant hormones 4: 15–19
Arbor vitae, as beetle host 1: 35
*Arisaema dilatatum*, in China 2: 27, 28
Armenia, quince-growing in 1: 5, 5
*Arnoldia*, Index to Volume 66 1: 36–43  — and Donald Wyman 2: 19
Arnot Teaching and Research Forest 3: 32, 32

Aronia 3: front/back covers, 14–25, 14–18, 22, 24
— *arbutifolia* 3: 14–15, 15–19, 21–22, 24
— flowers 3: 15
— foliage 3: 15
— fruit 3: 14
— fruit chemistry 3: 14, 21, 23–25
— crop potential 3: 19–25
— genetics 3: 19, 21, 22, 24–25
— habitat and range 3: 18–19, 18–20, 21
— hybrids 3: 21, 25
— juice products 3: 22–25, 23
— ‘Likernaya’ 3: 25
— *melanocarpa* 3: 15–19, 16, 17, 21–25, 22, 24
— foliage 3: 17, 22
— fruit 3: front cover, 16, 24
— growth habit 3: 21, 22
— ‘Nero’ 3: 24, 25
— x *Sorbus aucuparia* 3: 25
— ‘Viking’ 3: 24, 25
— mitschurini 3: 25
— ploidy and apomixis in 3: 19, 21, 22, 24–25
— prunifolia 3: 15, 18–19, 21, 22
— x *arbutifolia* 3: 21
— x *melanocarpa* 3: 21
— x *prunifolia* 3: 21
— taxonomy 3: 21
— and *Photinia* 3: 21

Ash, as beetle host 1: 34
— borer, emerald 1: 34

Asia, plants from 1: 20–30, 44; 2: 5, 22–28, 3: 2–13, 36, 4: 28

Asian long-horned beetle (ALB) 1: 34, 34
— emerald ash borer (EAB) 1: 34, 34
— European spruce bark 1: 35
— red-haired pine bark 1: 33, 33
— six-toothed bark 1: 33, 33

Beetles, damaging 1: 31–35, 33–4
— emergence and phenology 1: 32, 35
— fungal vectors of 1: 33, 35
— links to information 1: 34
— new surveys and trapping methods 1: 32–35
— observation of 1: 34
Bene, John 3: 27
Bentham, George 4: 26
